

ID Federation Service CloudDesktop Renewal Announced

October 5, 2022

NTT Communications Corporation

*This announcement is an updated version of the announcements made on July 25, 2022, August 22 and September 5.

Thank you for always using ID Federation.

On November 6, 2022, we will be renewing CloudDesktop, the application portal site currently used for single sign-on (IDP-initiated SSO) originating from ID Federation, into PingOne dock, a portal site with a revamped user interface.

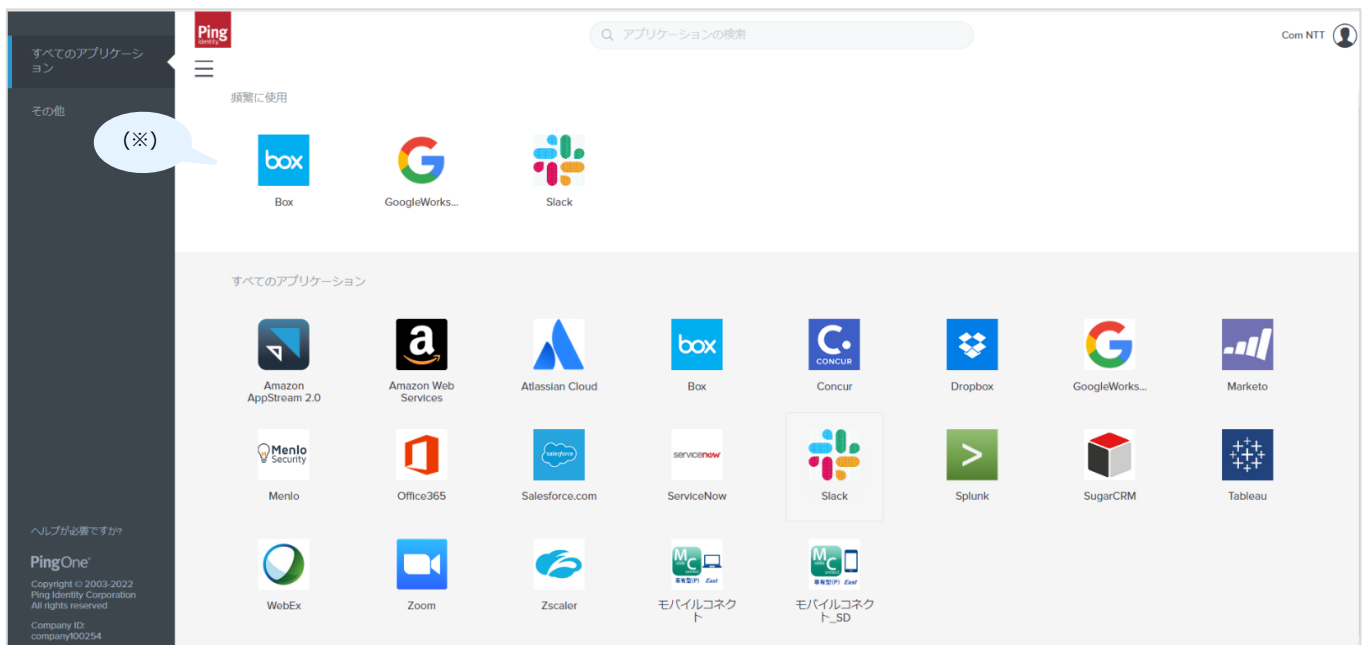

Note that if you use the service with single sign-on (SP-initiated SSO) originating from an application, CloudDesktop will not be displayed, so it will not be affected by the renewal and will not be included.

1. When to switch to the PingOne dock

It will switch to "PingOne dock" on Sunday, November 6, 2022 from 23:00 to 6:00 the following day.

Switching will not affect your use of ID Federation services.

2. PingOne dock user interface

(*) The most frequently used apps are displayed at the top of the dock when more than 15 applications are registered.

3. PingOne dock pre-check

Currently, customers can connect to the switched PingOne dock by following steps (1) - (3) below.

Check out the user interface of the PingOne dock before switching.

< How to check the PingOne dock >

- ① Connect to the confirmation URL for the PingOne dock.

<<https://desktop.pingone.com/{companyID}/Selection?cmd=newDock>>

*Please specify the companyID that we informed you when you signed up for the contract for the *companyID*.

If you don't know your companyID, check the Contract Information tab on the administrator portal.

(Example)<<https://desktop.pingone.com/company999999/Selection?cmd=newDock>>

- ② Enter your user ID/password.

Please enter your current login user ID/password.

*No user ID/password is required when an authenticated session is in the enabled state.

- ③ The PingOne dock appears.
